Your Organization Account will be verified by the Registry Administrator to ensure there are no duplicates (existing Organizations with the same name). When verification is complete you will receive an email to confirm the Organization Account has been approved. You do not need to wait for approval to register a Site.

If a duplicate is identified the Registry Administrator will contact you to confirm if the Organization Account should merge with the existing and support you with next steps.

II. Add a new User

A User Account is created to join an existing Organization Account. Once the account is created, the User can create and manage Sites they would like to rate using the RHFAC Rating Survey. User Accounts are created by invitation only. Invitations to Users can only be sent by an existing User with the **Organization Manager** role.

The User will receive an invitation to create an account via email.
See **Section III** for instructions on how to accept this invitation.

The status will remain pending until the new User creates their account.
Once they sign in the status will change to active.
